

DETAIL INSPIRATION

DESCRICIÓN

Plataforma de acceso aos contidos da revista de arquitectura e detalles construtivos *Detail* (ed. Alemana)

CONTIDO

Artigos a texto completo de proxectos arquitectónicos que se publicaron na revista *Detail*. Non inclúe o contido íntegro dos artigos da revista.

Cobertura cronolóxica: de 1987 á actualidade.

Idioma: inglés e alemán

ACCESO

URL: <https://inspiration-detail-de>

- Desde ordenadores da UDC ou con conexión wifi á rede da universidade
- Desde fóra do campus require conexión VPN á Universidade (para a identificación de un usuario UDC) [en caso de incidencia coa conexión, poña unha incidencia en [AxudaTIC](#) ou póñase en contacto co Servizo de Acceso ao Documento: T. 981167700. Ext. 5669, 5674, 5675, 5676, accesodoc.bib@udc.es]

USUARIOS AUTORIZADOS

Comunidade universitaria da UDC.

CONSULTA DE CONTIDOS

Dúas opcións:

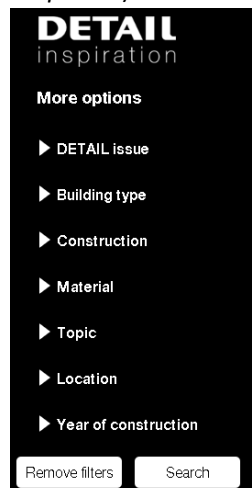

- Navegación por contidos recentes o agrupación por categorías.
- Búsqueda de proxectos por diferentes criterios.

BUSCA DE PROXECTOS

Busca básica de proxectos en linguaxe libre (*Search projects*)

Busca de proxectos por diferentes criterios (*More options*)

Opcións de busca (no menú desplegable):

- **Detail Issue:** números correntes e especiais
- **Building type:** tipoloxías de edificios
- **Construction:** partes estruturais
- **Material**
- **Topic**
- **Location:** busca por país
- **Year of construction:** rangos de data

VISUALIZACIÓN E XESTIÓN DOS RESULTADOS

Lista de resultados con acceso ao texto completo dos artigos, dixitalizados en formato PDF. Permite a impresión e descarga de los artigos.

GUÍA DE CONSULTA

1. ACCESO Á PLATAFORMA

Opcións de busca (na parte superior: *Search Projects / More options*).

Últimas buscas, proxectos recentes, as miñas coleccións (se te rexistras podes gardar os teus proxectos favoritos) e artigos agrupados por categoría.

Welcome, Universidade da Coruña!

Latest search

The results of your latest search remain available.

Serafin Lorenzo

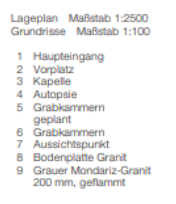

Fotos:
Hisao Suzuki

Die nordwestliche Ecke der iberischen Halbinsel auf der Höhe von Santiago de Compostela ist der westlichste Punkt Europas. »Finisterre«, das Ende der Welt, nennen die Einheimischen diesen Küstenabschnitt. Die karge Felslandschaft und die Weite des Meeres dienen als Inspiration für die Granitkuben, die wie herabgestürzte Felsen oder angeschwemmtes Strandgut entlang des gewundenen Weges aufgereiht sind. Den Rahmen für das Zusammensein von Verstorbenen und Hinterbliebenen sollte eine Architektur bilden, die in Einklang mit der Natur steht. In jedem der Granitkuben sind zwölf Gräber untergebracht, ein eingezogener Vorbereich schützt vor Sonne, Wind und Regen und gibt den Hinterbliebenen die nötige Privatsphäre. Die sechzehn bisher errichteten 3,30 Meter hohen und 5 Meter langen Grabkammern öffnen sich zum Meer hin. Die Konstruktion massiver Steinplatten, die nur dank der Schwerkraft und einer dünnen Mörtelschicht miteinander verbunden sind, beruht auf einer langjährigen galizischen Tradition, die in Vergessenheit geriet und durch César Portela wiederbelebt wurde. Die Bodenplatten sind durch Sockel aus Bruchsteinmauern vom Gelände abgesetzt und auf die Fundamentplatte aus Beton aufgelegt. Darauf stehen die Wände, die ebenfalls aus massiven ca. 20 cm dicken und 72 cm breiten Platten aus grauem Mondariz-Granit gebildet werden, der in der Umgebung gebrochen wird. Das Gewicht der Dachquader stabilisiert die Wände ohne weitere Aussteifung. Aufgrund der hohen Dichte des Gesteins dringt kein Wasser in die Platten ein, daher bildet sich auch kein unerwünschter Bewuchs auf den rauen geflammten Oberflächen. Drei der Granitkuben sind um einen Platz gruppiert und werden bergseitig erschlossen. Sie be-
