EMERGING TALENT

International postdoctoral research talent acquisition programme
MSCA COFUND 2025 Call

Research staff in the host organisation

Research staff will spend 3 to 6 months in the host organisation, during which they will contribute their **expertise in the areas defined by the organisation**.

The host entity must designate a **supervisor** for the research staff during their stay.

The participation of the host entity will not generate **any economic cost**, and all expenses will be covered by the Universidade da Coruña.

Description

Emerging Talent is part of a set of European initiatives designed to promote research and development:

- **MSCA (Marie Skłodowska-Curie Actions)**
European Union programme designed to support the training, mobility and development of researchers.
- **COFUND**
One of the specific actions within MSCA, which supports doctoral programmes and postdoctoral financial aid programmes.
- **EMERGE**
Initiative promoted by the Universidade da Coruña and 8 other European academic institutions, financed through the Erasmus+ programme, with the aim of improving education, research and innovation.

The Emerging Talent proposal **aims** to enable 10-15 excellent postdoctoral researchers of any nationality, in the first years of their postdoctoral career, to develop a cutting-edge and innovative research project at the Universidade da Coruña, with a practical experience of 3 to 6 months in non-academic entities (company, technology centres).

Benefits for the host entity

Hosting one of the researchers admitted to the programme for a period of 3 to 6 months is a great opportunity for any organisation:

- **Access to expert knowledge**
Having a highly qualified person in strategic or areas of interest for the company, which can boost innovation and improve internal processes.
- **Strategic collaboration**
Participation in a prestigious programme of the Universidade da Coruña offers opportunities to strengthen ties with the academic and professional environment, providing value to the company in terms of innovation and projection.
- **Boosting innovation and social development**
The host entity, by supporting highly qualified researchers, contributes not only to the advancement of their own projects, but also to the innovative ecosystem and the progress of knowledge.

Time planning

- **June 2025**. Presentation of the proposal.
- **Beginning 2026**. Resolution of the granting of funding and green light to the programme. We will inform interested host entities.
- **Spring-Summer 2026**. Start of the programme.
- **First semester 2027**. Recruitment of research staff.
- **2027-2031**. Effective period during which the 3-6 month stay in the host entity will take place.

Declaration of interest

By completing and signing the **declaration of interest**, the host entity expresses its willingness to participate in the Emerging Talent programme of the Universidade da Coruña and to **form part of the list of possible host entities for the selected research talent**.

Being part of this list **does not imply an automatic commitment** to receive research staff, as the assignment is conditional on the final composition of the candidate researchers and their profiles, areas of knowledge, etc. The actual stay will depend on these research profiles being in line with the interests and needs of the host organisation, which will be informed at all times.
